

SCALP & HAIR TREATMENT

The CHANDA Spa Signature Scalp and Hair Treatments are of professional quality developed for her salon clientele, now brought to you via her virtual spa-salon so you can create your own private CHANDA SPA-experience any time anywhere through a personal tutorial on how to properly perform these services for yourself in order to maintain your scalp and hair care regimen. The CHANDA technique is facilitated with CHANDA OCEANIC SEA MINERALS product line which is formulated using natural-organic ingredients containing vital minerals, polysaccharides, polyphenols, proprietary sea minerals complex, amino acids, antioxidants, and antibacterials, aha's and vitamin c. Our powerhouse formulations support and enhance the natural process of cellular renewal and repair a process by which the individual cells draw in nutrients and expel toxins.

When using aha's and vitamin c mild tingeling is normal. However, if burning occurs, immediately rinse consult your physician

OCEANIC CONDITIONER

INSTRUCTIONS FOR SIGNATURE SPA 3Q.E.S.H. (3 Minute Quickie Exfoliating Scalp and Hair Treatment)

1- Apply Oceanic Exfoliant Spray to dry scalp. Application should be ample enough to cover the scalp, it is not necessary to over saturate the scalp. Massage gently into scalp and through to ends in a vertical downward motion 1 minute (do not twist and waud hair creating knots)

2-Apply OCEANIC SHAMPOO directly onto the scalp. Start with a few pumps of shampoo and reapply only for even distribution to scalp and hair strands.

3- Massage into the scalp, continuing vertically in a downward motion throughout the hair strand.

4- While in the shower carry on with your routine allowing the products to rest on your scalp and hair.

4* If you are performing this treatment outside of the shower, simply allow products to rest on scalp and hair for 3 minutes then rinse using luke warm water finishing with cool water rinse.(hot water is harsh on the scalp and hair, you will notice better results and preserve the integrity of your scalp and hair by finishing with cool water)

5-Apply a few pumps of Oceanic Conditioner to fingers and distribute evenly to scalp and hair as a rinse/detangler.

6- Towel dry hair in the downward motion of hair strand. This method helps to alleviate stress on the hair strand as well as minimizing tangels and hair breakage.

7- Reapply OCEANIC CONDITIONER to hair strands working product up to the scalp, then Layer CHANDA OCEANIC SEA MINERALS PRODUCTS to scalp and hair, style hair as desired or air dry

Special note, Amounts of products applied vary of course due to density, sparceness and texture of hair. For additional products for finishing care and conditioning please refer to the products menu
